

## NUVIA Dynamics Inc.

Located in Concord (Toronto), Ontario, Canada, NUVIA Dynamics Inc. (formerly PICO Envirotec, Inc.) has been designing and manufacturing a range of advanced geophysical hardware systems for mining, oil / gas, environmental and nuclear/radiation monitoring projects for over two decades. All design, research and development is performed in-house by a team of geophysicists, software professionals and technicians and involves subject matter experts outside the company when necessary. Our next-generation technology is used by private and public sector clients all over the world.

Discover NUVIA Dynamics' commitment to research and development, fulfilling client objectives and providing excellence in service delivery. This focus reflects our commitment to customer service satisfaction.

NUVIA Dynamics is a subsidiary of the [Nuvia Group](#), part of the [Soletanche Freyssinet](#) arm of [Vinci Construction](#), France, the world's largest construction and related services company. Nuclear Services in this group can come from [NUVIA Canada](#), [NUVIA UK](#), [NUVIA France](#), [NUVIA CZ](#), [NUVIA Nordic](#) amongst others in the Group.

NUVIA Dynamics also proudly offers radiation measurement products from its NUVIA-related sister companies located in [Germany](#), [the Czech Republic](#), [France](#) and [the UK](#) under the [NUVIATech Instruments](#) brand.

As part of the NUVIATech Instruments branded group, we provide standard and tailored measurement solutions to nuclear owners, operators and stakeholders for all stages of the facilities' life cycle. We can supply both components (detectors, analysers and software) or complete measurement systems which can incorporate carrier equipment, conveyor equipment, GPS control, signal processing units. From modelling to implementation, we use exclusive know-how and state-of-the-art technologies in its monitoring systems dedicated to six major fields of application: waste management, homeland security, laboratories, health physics, continuous process monitoring and environmental monitoring.

NUVIA Dynamics sells and services all NUVIATech Instruments branded products out of its Concord, Ontario, Canada facility and can arrange for their calibration when necessary. We are your "one-stop shop" for radiation measurement instrumentation needs in North America.
